

CALL FOR EXPRESSION OF INTEREST

Development of the Arewa Civic Tracker – Digital Civic Monitoring and Governance Reporting Platform

Organization: Roadmap for Women and Youth Development (RAWYOD)

Project: Voices for Inclusive Civic Engagement and Social Change Towards Open Voting, Oversight, Transparency and Electoral Strengthening (VOICES TO VOTES)

Supported by: Nigeria Youth Futures Fund (NYFF)

Location: Yobe State, Nigeria

Reference No.: RAWYOD/NYFF/VOICES-TO-VOTES/2026/001

Date of Issue: 7th September, 2026

Deadline for Submission: 13th September, 2026

1. Background

Roadmap for Women and Youth Development (RAWYOD) is a youth-led and women-focused organization advancing youth leadership, civic participation and accountable governance across Northeast Nigeria.

RAWYOD is implementing the **VOICES TO VOTES** project under the Nigeria Youth Futures Fund (NYFF) from September 2026 to April 2027. The project seeks to strengthen informed youth participation in democratic processes and enhance accountability in governance across all **17 Local Government Areas (LGAs) of Yobe State** ahead of the 2027 elections.

A key component of the project is the development and deployment of the **Arewa Civic Tracker**, a low-tech digital platform that will support youth-led monitoring and documentation of public projects and governance issues across Yobe State in Northeast Nigeria.

RAWYOD therefore invites qualified and experienced software development firms to submit an **Expression of Interest (EOI)** for the design, development, deployment and initial technical support of the Arewa Civic Tracker.

2. Purpose of the Assignment

The purpose of this assignment is to develop a **simple, user-friendly, low-cost and scalable digital civic monitoring platform** that enables trained youth to document and report governance issues and public project information from communities across the 17 LGAs of Yobe State.

The platform should enable Civic Intelligence Focal Persons to collect and submit information in a structured manner, while allowing RAWYOD to review, manage, analyse and use the information generated for monitoring, advocacy, stakeholder engagement and public communication.

3. Key Functional Requirements

The selected firm will be expected to design and develop the Arewa Civic Tracker with, at minimum, the following core functionalities:

A. User Registration and Access Management

- Secure user registration and login.
- Different user access levels, including:
 - RAWYOD Administrator;
 - Civic Intelligence Focal Persons;
 - Data/MEAL or monitoring users.
- Ability for administrators to activate, deactivate and manage users.
- User activity tracking.

B. Civic Issue and Public Project Reporting

The platform should allow authorized users to document:

- Public projects being monitored;
- Governance/service-delivery issues;
- Location of the project or issue;
- LGA and community;

- Sector/category, such as health, education and livelihoods;
- Description of the issue/project;
- Current status/progress;
- Key observations;
- Relevant stakeholders/duty bearers;
- Date of observation/reporting;
- Supporting photographs and other evidence where applicable;
- Follow-up actions and updates.

C. Real-Time Data Submission

The platform should enable users to:

- Submit reports from the field;
- Upload supporting evidence;
- Update previously submitted reports;
- Track the status of submitted reports;
- Capture subsequent follow-up information.

D. Data Review and Verification

The platform should provide an administrative interface for RAWYOD to:

- Review submitted reports;
- Verify or validate information;
- Request clarification where necessary;
- Approve/reject reports;
- Categorize and update issue status;
- Maintain an auditable record of submissions and updates.

E. Dashboard and Data Visualization

The platform should provide an easy-to-use dashboard showing, at minimum:

- Number of reports submitted;

- Reports by LGA;
- Reports by sector/category;
- Public projects/issues being tracked;
- Status of reported issues;
- Verified versus pending reports;
- Trends over time.

F. Search, Filtering and Reporting

The system should allow authorized users to:

- Search reports;
- Filter information by LGA, sector, date, category and status;
- Generate summary reports;
- Export relevant data in commonly usable formats such as Excel/CSV and PDF, where technically appropriate.

G. Mapping/Location Functionality

The firm should propose an appropriate mechanism for capturing the location of reported projects/issues, including LGA and community.

Where feasible and cost-effective, the platform should support map-based visualization of reported projects and issues.

H. Low-Bandwidth and Mobile Accessibility

Given that the Tracker will be used by youth deployed across all 17 LGAs, including rural and underserved communities, the solution should be:

- Mobile-friendly;
- Lightweight;
- Simple to operate;
- Optimized for low-bandwidth environments;
- Accessible through commonly available devices.

Firms are encouraged to propose appropriate approaches for maintaining functionality where internet connectivity is limited.

4. User Groups and Expected Scale

The initial platform should be designed to support:

User Group	Expected Number
Civic Intelligence Focal Persons	34
RAWYOD Administrators/Monitoring Team	To be determined
Initial LGAs	17
Initial Geographic Coverage	All 17 LGAs of Yobe State

The system should be designed with sufficient flexibility to accommodate additional users, LGAs and civic monitoring activities in the future.

The project's sustainability plan specifically envisages that the **Arewa Civic Tracker will remain a functional, low-cost digital platform for continued reporting and monitoring beyond the grant period.**

5. Expected Deliverables

The selected software development firm will be expected to deliver:

1. **User Requirement Specification (URS)** based on consultations with RAWYOD.
2. **System architecture and technical design.**
3. **UI/UX design and prototype** for RAWYOD approval.
4. Fully functional **Arewa Civic Tracker**.
5. Web-based administrative/dashboard interface.
6. Mobile-responsive field reporting interface or appropriate mobile solution.
7. User roles and access management.
8. Civic issue/public project reporting modules.
9. Data review, verification and management functionality.
10. Dashboard and data visualization.

11. Search, filtering and reporting functionality.
12. Data export functionality.
13. Appropriate database and data-security architecture.
14. System testing and bug fixing.
15. Deployment and configuration.
16. Hosting setup and technical documentation.
17. Administrator and user manuals.
18. Training/orientation for designated RAWYOD staff and users.
19. Initial post-deployment technical support and maintenance.
20. Full handover of the developed system, source code and relevant technical documentation to RAWYOD.

6. Technical and Data Requirements

The proposed solution should demonstrate:

- Secure database management;
- Appropriate user authentication and authorization;
- Protection of user and submitted data;
- Regular data backup;
- System reliability and scalability;
- Easy administration and maintenance;
- Appropriate hosting arrangements;
- Clear ownership and access rights for RAWYOD;
- Ability to make future modifications without excessive dependence on the developer.

The firm should clearly state the proposed **technology stack, hosting arrangements, security measures, backup arrangements and maintenance approach**.

7. Implementation Approach

Interested firms should propose a practical development approach covering:

Phase 1 – Discovery and Requirements

- Consultation with RAWYOD;
- Confirmation of functional requirements;
- User journey mapping.

Phase 2 – Design

- UI/UX design;
- System architecture;
- Prototype for review and approval.

Phase 3 – Development

- Development of core modules;
- Database configuration;
- Dashboard and reporting functions.

Phase 4 – Testing

- Functional testing;
- User acceptance testing;
- Security and performance testing;
- Bug fixing.

Phase 5 – Deployment and Training

- Deployment;
- User onboarding;
- Training of RAWYOD administrators and Civic Intelligence Focal Persons.

Phase 6 – Support and Handover

- Initial technical support;
- Documentation;
- Source-code and system handover.

8. Required Firm Qualifications

Interested firms must demonstrate:

1. Legal registration and authorization to operate in Nigeria.
2. At least **3 years of relevant experience** in software/web/mobile application development.
3. Demonstrated experience developing data collection, monitoring, reporting, civic technology, governance, accountability or similar platforms.
4. Proven experience in database and dashboard development.
5. Experience developing solutions for low-bandwidth or field environments is an advantage.
6. Availability of qualified software developers, UI/UX specialists and relevant technical personnel.
7. Demonstrated ability to provide post-development technical support.
8. At least **two examples of similar assignments successfully completed**.
9. Strong data protection and cybersecurity practices.
10. Ability to complete the assignment within the required timeframe.

9. Documents Required for Expression of Interest

Interested firms should submit:

A. Company Information

- Company profile;
- Certificate of Incorporation/Registration;
- TIN and other applicable statutory registration documents;
- Company address and contact details.

B. Technical Submission

A brief technical proposal containing:

- Understanding of the assignment;
- Proposed solution and development approach;
- Proposed key features/modules;
- Proposed technology/architecture;

- Development methodology;
- Implementation timeline;
- Quality assurance/testing approach;
- Data security and backup approach;
- Hosting and maintenance approach;
- Handover and sustainability approach.

C. Relevant Experience

- Portfolio of similar applications/platforms developed;
- At least two relevant client references;
- Links or demonstrations of previous relevant work, where available.

D. Team Composition

CVs/profiles of key personnel proposed for the assignment, including:

- Lead Software Developer/Project Lead;
- UI/UX Developer/Designer;
- Backend/Database Developer;
- Other relevant technical personnel.

E. Financial Proposal

A separate financial proposal clearly indicating:

- Development cost;
- Hosting/deployment costs;
- Training costs;
- Technical support/maintenance costs;
- Any licensing costs;
- Any other applicable costs.

All costs should be clearly itemized.

10. Proposed Duration

The selected firm will be expected to complete the development, testing and deployment within an agreed period following contract signing.

Firms should provide a **clear work plan and realistic development timeline** in their proposal.

Given the project's implementation period of September 2026–April 2027, early deployment of the Tracker is important to enable the 34 trained youth to commence civic monitoring activities.

11. Evaluation Criteria

Expressions of Interest will be evaluated using the following indicative criteria:

Evaluation Area	Weight
Understanding of assignment and proposed technical solution	20%
Relevant experience and portfolio	25%
Technical capacity and proposed team	20%
Functionality, usability and scalability of proposed solution	15%
Data security, maintenance and sustainability approach	10%
Financial proposal/value for money	10%
Total	100%

RAWYOD reserves the right to invite shortlisted firms for a technical presentation or demonstration before final selection.

12. Budget Consideration

The development of the Arewa Civic Tracker is included within the approved VOICES TO VOTES project budget.

Interested firms should therefore provide a **cost-effective solution that delivers the required core functionality within the available project resources.**

13. Ownership and Intellectual Property

The selected firm will be required to transfer to RAWYOD all relevant project deliverables upon completion, including:

- Source code;
- Database structure;
- System documentation;
- UI/UX assets;
- Administrative credentials;
- Technical documentation;
- Relevant deployment/configuration information.

The final contract will clearly define **ownership, intellectual property, data ownership, confidentiality and access rights**.

14. Safeguarding, Confidentiality and Ethical Requirements

The selected firm will be required to:

- Maintain strict confidentiality of all project and user information;
- Protect data collected through the platform;
- Not share or use project data for unauthorized purposes;
- Comply with applicable data protection requirements;
- Ensure appropriate security controls;
- Immediately report any suspected data breach or security incident to RAWYOD.

15. Submission of Expression of Interest

Interested and qualified software development firms should submit their **Expression of Interest, Technical Proposal and Financial Proposal** electronically to:

Email: procurement@rawyod.org

Subject: EOI – Development of Arewa Civic Tracker – VOICES TO VOTES

Submission Deadline: 13th September, 2026

Late submissions may not be considered.

Only shortlisted firms will be contacted.

16. Important Note

This Expression of Interest is intended to identify a qualified software development firm capable of delivering a **practical, user-friendly, low-cost and sustainable civic technology solution**. RAWYOD reserves the right to accept or reject any submission and is not obligated to select the lowest-priced proposal.
